Open up new possibilities

As one of the world's principle laminate manufacturers, Greenlam brings a legacy of exceptional artistry, unsurpassed quality and unyielding passion for excellence. With a production capacity in excess of 24.52 million sheets per year, our passion is to ensure that superior quality products are accessible to you, wherever you may be across the globe. Innovative technology and creative solutions have been our guiding principles from our inception.

No compromises on quality

Its all about the details – from the inception through to the creation, the processes and the flow. Throughout Greenlam's entire manufacturing process, we apply the highest standards to ensure that the most exacting quality is attained, beginning with sourcing from suppliers who provide us with paper which is either recycled or made from responsibly sourced* timber, to collaborating with printers behind exquisite designs.

The final result is a consistent product that is engineered to look as good as it performs. We're proud to share the meticulous craft, design and production that's at the core of Greenlam laminates.

Sustainability is key

We are proud to exceed the industry benchmarks, relating to all areas of green certifications. In particular, independent rigorous tests have shown that Greenlam laminates emit minimal levels of VOCs**, which have the potential to adversely impact the health of people that are exposed.

These are certified to be suitable for use in environments where children and vulnerable individuals may spend significant periods of time, such as schools, hospitals and clinics.

Greenlam provides FSC® Certified product , on request (certificate no. DNV-COC-002714)

**Volatile Organic Components

Greenlam

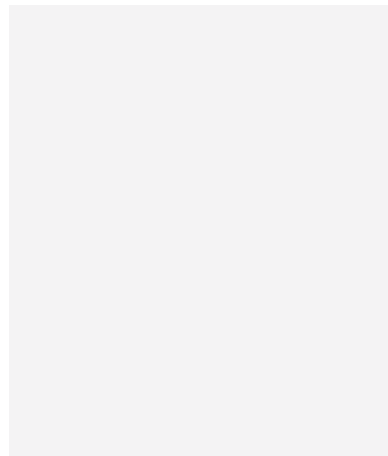

Door Collection

Primary

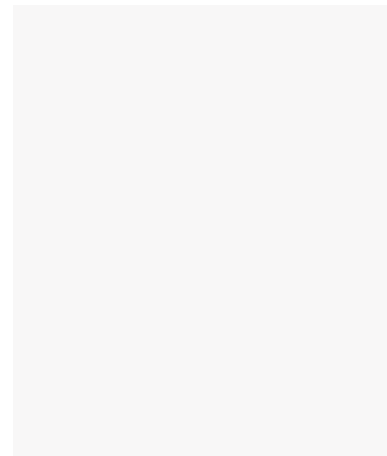

The Greenlam Door Collection palette has been lovingly curated to cater for every technical and design requirement of your project.

From the foundation of the primary decors to the muted tones of the pastel collection.

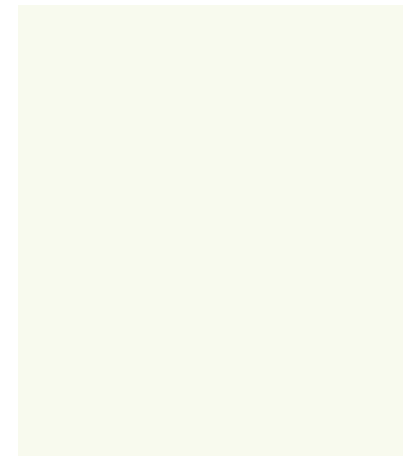

Either standalone or used in combination with the wood designs you have the tool kit to unlock amazing designs and fabricate incredible projects.

Anti-virus and
Anti-bacterial
Protection

Greenlam laminates are treated with high-efficacy, anti-microbial agents, retarding and eliminating up to 99.9% of commonly found bacteria and viruses, including SARS-CoV-2, which causes COVID-19.

Fire
Retardant

Greenlam laminates have been tested to achieve optimal fire-propagation reduction and surface spread-of-flame performance. Proof of certification is available upon request.

NSF
Certification

Greenlam laminates are manufactured according to the NSF^ food safety and environmental health standards, and can come in direct contact with food.

Throughout our entire manufacturing process we ensure the highest level of sustainable practices are attained, beginning with sourcing materials from suppliers who provide us with fully traceable FSC and PEFC certified materials. For further information please refer Greenlam's sustainability policy. Greenlam provides FSC® Certified product, on request (certificate no. DNV-COC-002714). RAL & NCS references are the nearest equivalents and should be verified visually.
